OBJECTIVE

An IT student building a strong foundation in network infrastructure and software development. Currently developing practical skills in Cisco network simulation, security protocol configuration, and full-stack web application development. A hardworking, adaptable team player eager to apply classroom knowledge to real-world challenges, contribute to organizational goals, and grow professionally within a technical environment.

EDUCATION

TERTIARY EDUCATION

Pamantasan ng Lungsod ng Valenzuela

Bachelor Of Science In Information Technology

Valenzuela City, NCR, PH.

2023 - Present

WORK EXPERIENCE

Let's Print It

May 2020 - August 2023

Assistant and Maintenance

- Managed daily production, synchronized client communications, and optimized inventory workflows to ensure high-quality service and consistent project delivery.

LikhaPay

November 2025 - December 2025

Assistant Quality Assurance

- Validated payment workflows through rigorous quality assurance testing, resolved user-facing incidents via systematic troubleshooting, and enforced operational standards to maintain system reliability and deliver a secure, seamless billing experience.

PROJECTS

EsCee Hub | React.js, Expo, Tailwind CSS, Supabase

January 2026 - May 2026

Technical Lead

- Optimized student management by engineering a web-based administration platform to organize duty assignments and hours verification; implemented Geofenced QR attendance tracking and an integrated duty chatbox to synchronize administrative communication; and automated hours verification through a Confidence-Based Score algorithm.

EduTrack | HTML5, CSS3, JavaScript (ES6+), Django, SQLite, Scikit-learn

December 2025

Backend Developer

- Streamlined student performance management by developing a centralized web application to automate the recording, analysis, and monitoring of academic data; empowered faculty with efficient tools to manage grades, student records, and reporting workflows; and provided students with transparent access to track their progress and academic standing.

SKILLS

Web Development: HTML 5, CSS 3, Tailwind CSS, React.js, JavaScript (ES6+), and PHP

Programming Language: Java, Python, and C#

Databases: MySQL, Microsoft SQL, Supabase, and Firebase

SDLC & Workflow Tools: Git, GitHub, and Vercel

Networking & Infrastructure: Wireshark and Cisco Packet Tracer
